

TANÚSÍTVÁNY

CERTIFICATE

Hungarian Association of Welding Technology and Material Testing as a Management system certifier recognizes that

BELLO BREAKING Korlátolt Felelősségű Társaság

name of the company

H-1154 Budapest, Szerencs utca 172.

registered office/location*

H-3070 Bátonyterenye, Ózdi út 13.

H-3070 Bátonyterenye, Ózdi út 22/b.

registered site/location*

registered branch/location*

whole

organizational unit(s)

complies with the criteria of MSZ EN ISO 14001:2015 standard.

The scope of the certification:

Breaking of reinforced concrete buildings, reinforced concrete foundations- and structures, industrial projects, technological systems, pipings, piping systems, collecting stations, equipments, small- and large oil-, respectively water tanks, underground- and aboveground column tanks, high-pressure boilers, compressors, separators, measuring stations and all kinds of insulations.

Disassembly of low power- and high-power heated changers onsite, completion of large bulk ground works, landscaping of construction- and breaking fields, exploitation of contaminated ground, storage and grinding of concrete refuse. Completion of erection works, completion of breaking works on explosion endangered areas by hand respectively power operated.

Critical power lifting, craning. Working with embarkation: working with critical danger of fire; lifting of loads under special conditions; first disassembly of dangerous equipments, completion of works with disassembly of pressure parts of technological systems; emergency refuelling. Chemical cleaning of technological systems; completion of works with danger of dropping or submersion aboveground or under water, without technical protection; high pressure cleaning; completion of other breaking works with extended risk or under special conditions.

Dismantling, breakdown of all kinds of asbestos insulation, all kinds of asbestos-containing roofs, and all types of asbestos-containing pipes;

demolition of complete roof structures, chimneys, ducts, drainage systems, bridges, bridge pillars, support structures, and complete slaughterhouses; demolition of self-propelled cranes, and bridge cranes; mechanical, building engineering breakdowns; construction work; construction and installation of assembly concrete, reinforced concrete, and concrete slabs; creating rainwater and sewage trenches, preparing road construction; dredging and deepening of rivers and lakes

Identity number of the certificate: **KIR-HU-0038-2022-1**

The certificate issued on: **2023.02.04.**

The certificate valid until: **2025.02.03.**

First issue date: **2019**
